DOUBLE HUNG WINDOW
The Classic Range

STREAMLINED HARDWARE

The Carinya Classic Double Hung Window has been designed with matching stylish hardware, with the option for a lockable or non-lockable handle.

CARINYA CLEARLY BETTER

The Carinya Classic Double Hung Window is a unique combination of form and function not previously available in the residential category.

Besides a modern designer look, the Carinya Classic double hung window is packed with a multitude of performance features, many of which are simply not available in competing products.

The window is specifically designed to accommodate screening within the head and sill to deliver that clean professional finish not available with many competitor products.

The Carinya attention to detail includes bump stops top and bottom to prevent frame damage. Full perimeter weather piles reduce air and water infiltration.

A choice of lockable or latchable handles are available.

The Carinya Classic double hung sits perfectly and seamlessly with the complete range of possible adjoining window and door options including overlights, sidelights and lowlights courtesy of the Carinya suite of couplers.

The entire Carinya Collection has been fully tested to meet or exceed Australian Standards AS2047, AS1170 and AS1191.

Why Carinya is better

- ✓ Commercial design pedigree.
- ✓ Suitable for all glass thicknesses from 4mm through to 8.38mm.
- ✓ Adjustable spring or spiral balance systems manufactured in Australia.
- ✓ Infills, end caps and weather seal guard against air, water, grit and insect penetration and increase acoustic performance.
- ✓ Screening system option is integrated *within* the head and sill for a sleek designer look.
- ✓ Handles are integrated into the sash for a clean look and ease of opening.
- ✓ The integrated Carinya design allows for flexibility in window selection (such as easily installing a double hung window beside a sliding door).
- ✓ Fully tested and certified to high acoustic requirements.
- ✓ The only residential double hung window designed by a market leader in commercial doors and windows.

Adjustable tensioning spiral or spring system.

Integrated sash handles with protective end caps.

All Carinya double hung window sashes feature corner blocks in all four corners of the sashes. These blocks make the sash more rigid, reducing twist and movement. This reduction in movement increases the performance of the window by reducing opportunities for air, water and dust infiltration.

These proprietary Carinya corner blocks also interact with the balances in both the top and bottom sashes to provide a stable and secure window.

The spring or spiral balances come in a range of lengths and strengths to suit a wide variety of different window heights and sash widths. Combined with an adjustable balance friction foot this ensures that your custom made window will operate smoothly for many years to come.

Specially designed finseals are fitted all around both sashes. These seals act as insulation to prevent drafts, dust, light and other contaminants coming in from outside through the edges of the windows.

*Carinya windows and doors:
Commercially-bred. Clearly better.*

Our Carinya Dealers are pleased to offer a solution for multiple keys for your doors and windows. It is possible to have 1 key for your front door, sliding door, french door, bi-fold door, sliding window, awning winder, double hung window and security door.
