Security for your outdoor living area

Crimsafe Patio Enclosures let you secure an exterior area, and make it fly and mosquito proof. Crimsafe's screen can reach from floor to ceiling, and can be bent to form a roof or a corner that completely encloses your patio or deck space.

The enclosure is designed and built according to your specific needs, and is not just assembled as an off-the-shelf product.

Crimsafe's Tensile-Tuff® mesh gives great visibility while at the same time it filters UV light and lets in the breezes of the season.

A secured patio looks great and eliminates the need to put Crimsafe on doors and windows overlooking the patio, saving you money. It's a great way to make the best room in the house - out of the house.

More about Patio Enclosures overleaf...

Applications

Increase security and enhance your lifestyle.

- Secure your patio or outdoor living area
- Can be a cost-effective room addition
- Can be used between existing posts to create an enclosure – no need to add new posts and supports
- Use it to provide a screened area in your home, courtyard or backyard
- Can be used as a walkway cover for sports fields or even jails
- Can be used to enclose and secure parking areas

Features and Benefits of Crimsafe's Patio Enclosure

Designed to Fit Existing Structures	The product can fit existing posts, and panels can even be linked back-to-back to form their own T-shaped posts, meaning no new posts are necessary
Concealed Fasteners	Snap-in covers conceal the product's fixings to enhance the smooth looks of the patio enclosure
Anti-Jemmy Leg/Gap Concealer	Means you can work with posts that aren't 100% straight and that a burglar can't find a leverage point between post and Crimsafe screen
Screw-Clamp Security	Only Crimsafe clamps 304 Tensile-Tuff® security mesh between 2 serrated pieces of metal, then drives a screw right through both mesh and frame to ensure a "vice-like" grip...and beat more burglars.
Tamper-Resistant Screws	Exclusive to Crimsafe. Screws can only be applied or removed by a tool registered with Crimsafe. This ensures the integrity of your security system.
Custom Built	Means a perfectly fitted job. Product can be made to fit the design and format of your patio space.
Enhanced Lifestyle	Crimsafe provides unhindered views, keeps out mosquitoes, and lets you keep a cool, safe house in summer while adding an outside room
WERS Rated	Improves the energy rating of glass windows and doors and gives your home the ability to gain a higher home energy star rating.
Solar Heat Gain Reduction	Solar heat gain is reduced by up to 53% reducing dependence on air-conditioning and saving on energy bills.
Passes Australian and Industry Standards	Crimsafe always exceeds the relevant Australian and Industry Standards for security
Full Range of Colours	Crimsafe stocks a range of standard colours so that the system you buy complements your home. Other colours are available on request.
Guaranteed for 10 Years	Crimsafe warrants the product from defects in materials under the conditions of normal use for up to 10 years from the date of purchase. Please refer to our Warranty & Care Guide for more information.

Only Crimsafe drives a screw right through mesh and frame – for unbeatable strength
